Node.js (server.js)

```
const express = require('express');
const app = express();
const mongoose = require('mongoose');

// Connect to the MongoDB database
mongoose.connect('mongodb://localhost/bucket-list', { useNewUrlParser: true, useUnifiedTopology:
true });

// Define a schema for the bucket list items
const itemSchema = new mongoose.Schema({
  name: String
```

```
});
```

```
// Create a model for the bucket list items
```

```
const Item = mongoose.model('Item', itemSchema);
```

```
// Define a route to get all bucket list items
```

```
app.get('/api/items', async (req, res) => {
```

```
  const items = await Item.find();
```

```
  res.json(items);
```

```
});
```

```
// Define a route to add a new bucket list item
```

```
App
```
